EDUCATION

Korea Maritime and Ocean University

Busan, Korea

B.S. in Electrical and Electronic Engineering

Mar. 2020 – Feb. 2026

• Total GPA: 4.0 / 4.5, Major GPA: 3.98 / 4.5

INTERNSHIPS

Embedded Signal Processing Lab

Busan, Korea

Undergraduate Researcher

Jul. 2024 – Jan. 2025

- Studied object classification models and embedding techniques in computer vision.
- Contributed to a computer vision-related research project.
- Delivered a poster presentation at an academic conference (KMMS).
- Managed research budget execution and related administrative tasks.

SEANET

Busan, Korea

Course-based Internship

Jan. 2025 – Feb. 2025

- Managed engineering drawing documents in the design department of a maritime communication equipment company in accordance with ISO standards.

RESEARCH INTERESTS

- Vision-Language-Action Models
- Robot Task Planning
- Robot Perception
- Multi-Modal Learning

CONFERENCES

A BLE-Based Bus Boarding System for the Visually Impaired

Jun. 2025

Su-won Jin, Ki-Hyun Kim, Jin-A Park, Kyu-Wan Han, Dong-Hoan Seo, Seung-Hoon Lee

- Poster Presentation
- The 10th ICT Undergraduate Paper Competition, Institute of Embedded Engineering of Korea (IEMEK)

Road Boundary Detection Method

Nov. 2024

Su-won Jin, Sang-Heun Baek, Hong-Il Seo, Dong-Hoan Seo

- Poster Presentation
- Korea Multimedia Society Fall Conference and Regular General Meeting, Korea Multimedia Society (KMMS)

PROJECTS

A BLE-Based Bus Boarding System for the Visually Impaired

Team Leader

Korea Maritime and Ocean University

Mar. 2025 – Jun. 2025

- Conducted as part of the Capstone Design course in the Spring 2025 semester.
- Integrated the Busan Metropolitan City bus information OpenAPI via REST and parsed XML data to collect real-time bus arrival information.
- Prepared and submitted a manuscript for a poster presentation at the 10th ICT Undergraduate Paper Competition.
- Delivered poster presentations at an on-campus competition and an academic conference.
- Managed project budget execution and expense records.

Real-time Toilet Paper Remaining Level Monitoring System

Team Leader

Korea Maritime and Ocean University

Sep. 2024 – Jan. 2025

- Conducted as part of the Capstone Design course in the Fall 2024 semester.
- Implemented an SQLite-based alarm logging system.
- Delivered poster presentations at on-campus competitions.
- Managed project budget execution and expense records.
- Patent pending.

Development of High-Density Smart Parcel Terminal Storage Infrastructure and Management Technology

Undergraduate Researcher

Embedded Signal Processing Lab, Korea Maritime and Ocean University Jul. 2024 – Dec. 2024

- Participated in a collaborative research project on high-density smart parcel terminal storage infrastructure and management technology.
- Collected datasets for parcel waybill recognition.
- Built the initial execution environment and UI for an object detection model prototype.
- Designed experimental setups under varying imaging conditions and conducted experiments.
- Managed research budget execution and expenditure records.

Inter-University B.SORI Project Competition

Team Leader

Dong-A University

Sep. 2024 – Oct. 2024

- Collaborated with students from other universities to identify local community issues and propose corresponding solutions.
- Developed tailored solutions to address motorcycle noise issues by categorizing areas into hillside residential zones and urban areas.
- Collected relevant information to develop solutions and delivered the presentation.

Proposal for a Non-Contact Surge (Lightning) Counter

Team Leader

Korea Maritime and Ocean University

Apr. 2024 – Jun. 2024

- Proposed an electromagnetic induction-based non-contact surge counter for the 2024 Student Railway Creative Works Exhibition.
- Conducted background research on surge counters, lightning arresters, and protective devices through papers, industry materials, and market analysis.
- Organized the research findings and prepared presentation materials to explain the project concept and technical background.

SKILLS

Language (English): TOEIC 755, OPIC IM2

Programming: Python, C/C++

Tools & Simulations: Visual Studio, VS Code, PyCharm, Multisim, MATLAB

AWARDS

2025 Capstone Design Competition

Gold Prize

Department of Electrical and Electronic Engineering

Jun. 2025

2024 Fall Capstone Design Competition Encouragement, Peer Evaluation Award

LINC 3.0 Project Group, Korea Maritime and Ocean University

Dec. 2024

2nd Capstone Design Video Content Contest

Excellence Award

LINC 3.0 Project Group, Korea Maritime and Ocean University

Dec. 2024

2024 B.SORI Project Competition

Encouragement Award

Industry-Academic Cooperation Foundation, Dong-A University

Nov. 2024

2023 Embedded Creative Robot Challenge Competition

Excellence Award

Korea Association of Robot Industry

Aug. 2023

HONORS

Scholarship for Excellence in Track Achievement

Feb. 2025

Busan Regional Power Semiconductor Talent Training Center, Korea
